

My name is Ivan Englesman and I am seeking term as your councilman. I was born and raised in Moose Jaw, Saskatchewan. Kenaston has been my home since 2008, and I love the charm, rural lifestyle, and opportunities it offers its residents. Kenaston has provided a safe place for myself and my wife Janelle to raise our two daughters Caelyn and Hunter.

Through years of experience and training I earned Interprovincial Journey status in multiple trades and management, which has equipped me with strong management and financial skills. I am a proud owner and operator of IVE Mechanical in Kenaston, which serves the needs of many local residents and facilities. As a business owner, I understand the value of team work and volunteerism. Since IVE Mechanical was established, I have been actively involved in the community, providing numerous donations of time, money, and product to our recreational facilities and community fundraisers. Recently, I became a member of the Kenaston Lions organization and I look forward to the opportunities to learn and collaborate with the members of this team.

Currently, I serve as Saskatoon Public School Division's Maintenance manager. This position includes overseeing thirty professional staff, maintaining 3.5 million square feet of facilities, upholding financial budgets, and developing and implementing multi-year projects. Over the years I have served on the Saskatoon Public School Division Health and Welfare committee and Pension committee.

Through the years I learned the importance of people making a difference in their communities and we need to be proactive and develop a strong plan for Kenaston. From my experience living,

volunteering, and working in Kenaston, I am knowledgeable of the situations and problems we have. I want to be part of a council that is progressive and develops an economically strong path into the future. I see the current challenges with our infrastructure and maintenance of our facilities, and feel that a detailed long-term plan can help us start to make positive, affordable, and manageable changes in our community. I will provide sound direction and support to the new Mayor and residents in Kenaston in regards to infrastructure, existing policies, and new policies. We all need to work together for the good of this community, and by collectively implementing strong administrative procedures and policies we can make Kenaston an even greater place to live that reinforces our strengths as a community. I am focused on our future and would appreciate your consideration in the coming election.

*Juan Englesman*
